Study 1 Addendum: osf.io/eckj7
Study 2 Pre-registration: osf.io/kfcmt
OSF Project Page: osf.io/65wfu
Sample

Final sample: 260 undergrads, 72 groups.

- Age: 18-30; $M_{\text{Age}} = 20$ ($SD = 2$)
- Gender: 58% Female; 28% Male; 14% NR
- Race/Ethnicity (could check more than 1):
  - 60% White/Caucasian
  - 17% Asian
  - 9% Hispanic/Latino
  - 4% Black/African American
  - >1% Native American
  - 4% Other
  - 15% NR

Procedure & Materials

**Phase 1: Dyadic Interaction**

Get to know each other

\[ \approx 15 \text{ minutes} \]

Get to know you game (18 Questions in a fixed Order):

1. What do you think is more important: making people feel good? Or saying exactly what’s on your mind? And why?

2. What do you do to manage schoolwork and deadlines?

3. What is the biggest lie you’ve ever told? Why did you tell it, and how did you feel about it?

4. What is one thing you frequently worry about? What do you do to manage that worry?

5. What do you typically do on a Friday night? What would your ideal Friday night be like?

6. What’s one new thing you want to try before you finish college?

Target Big 6:

A

C

H-P

N

E

O
**Procedure & Materials**

**Phase 1:** Dyadic Interaction
- Get to know each other
- **Tell About T**
- ≈ 15 minutes

**Phase 2:** Hearsay
- 3 Person Group Version
- **Told:**
  “It’s important that you give the most informative, objective, and accurate account of what the person you met is like.”
- ≈ 10 minutes

Pre-registration: osf.io/hqtfb

OSF Project Page: osf.io/65wfu
**Procedure & Materials**

**Phase 1: Dyadic Interaction**
- Get to know each other
- Approx. 15 minutes

**Phase 2: Hearsay**
- Tell About T
- Approx. 10 minutes

**Phase 3: Ratings**
- Self-perception
  - T(T)
- P1 Rating
  - P1(T)
- P2 Rating
  - P2(T)
- 3rd Person Meta-Perceptions
  - Not reported here

**Measures:**
- Big Six
  - Agreeableness
  - Conscientiousness
  - Honesty-Propriety
  - Neuroticism
  - Extraversion
  - Openness
- BFI-2\(^1\)
  - 60 item measure of Big Five
- Honesty-Propriety\(^2\)
  - 8 items from QB6

Analyses

• Differential Consensus/Accuracy
  • Correlation – relative similarity of ratings

• Mean-level accuracy not presented here.
Hearsay Consensus: Do P1 & P2 Agree?

Pre-registration: osf.io/hqtfb
OSF Project Page: osf.io/65wfu
Hearsay Accuracy: Is P2 right about T?

Pre-registration: osf.io/hqtfb

OSF Project Page: osf.io/65wfu
Hearsay Reputations

**Hearsay Consensus**

P1 & P2 agree a moderate amount.

**Hearsay Accuracy**

P2 is not very accurate.

Sample

• Final sample: 369 undergrads, 105 groups
  • 33-36 groups per condition
  • Age: 18-30; $M_{\text{Age}} = 19$ (2)
  • Gender: 59% Female; 27% Male; 14% NR
  • Race/Ethnicity (could check more than 1):
    • 62% White/Caucasian
    • 14% Asian
    • 11% Hispanic/Latino
    • 5% Black/African American
    • 2% Native American
    • 3% Other
    • 14% NR

**Procedure & Materials**

**Manipulation:**

**Status**
We want you to talk about what that person is like in general. Later on we are going to ask [P2] about [his/her] impressions of that person. **One thing we are going to ask is whether** [P2] **thinks the person you’re describing would make a good leader.** So we want you to help [P2] form an overall impression, **which includes forming an impression of that person’s leadership potential.**

**Affiliation**
We want you to talk about what this person is like in general. Later on we are going to ask [P2] about [his/her] impressions of that person. **One thing we are going to ask is whether** [P2] **thinks the person you’re describing would make a good friend who they would want to get close to.** So, we want you to help [P2] form an overall impression, **which includes forming an impression of that person’s potential as a friend.**

**Neutral/Control:**
*Bolded Parts Removed*
H1: Hearsay Consensus & Accuracy for Extraversion in Status Condition

Hearsay Consensus & Accuracy greater for Extraversion in Status Condition

Extraversion important for status.

Status context should focus hearsay on Extraversion

Pre-registration: osf.io/hqtfb

OSF Project Page: osf.io/65wfu
H1: Hearsay Consensus & Accuracy for Extraversion in Status Condition

How much do P1 & P2 agree about T?

Hearsay Consensus

χ²_diff (1) = 3.24, p = 0.072

Hearsay Accuracy

χ²_diff (1) = 0.02, p = 0.898

Pre-registration: osf.io/kfcmt

OSF Project Page: osf.io/65wfu
H2: Hearsay Consensus & Accuracy for Agreeableness in Affiliation Condition

Hearsay Consensus & Accuracy greater for Agreeableness in Affiliation Condition

Agreeableness important for Affiliation.

Affiliation context should focus gossip conversation on Agreeableness.

Pre-registration: osf.io/kfcmt

OSF Project Page: osf.io/65wfu
H2: Hearsay Consensus & Accuracy for Agreeableness in Affiliation Condition

**Pre-registration:** osf.io/kfcmt

---

How much do P1 & P2 agree about T?

Hearsay Consensus

$\chi^2_{\text{diff}} (1) = 0.52, p = .472$

Hearsay Accuracy

$\chi^2_{\text{diff}} (1) = 1.39, p = .239$

---

**OSF Project Page:** osf.io/65wfu
Hearsay Consensus: How much do P1 & P2 agree?

Pre-registration: osf.io/kfcmt

OSF Project Page: osf.io/65wfu
Hearsay Accuracy: How Accurate is P2?

Pre-registration: osf.io/kfcmt

OSF Project Page: osf.io/65wfu
Conclusions & Future Directions

• Hearsay Consensus is moderate to moderately high.

• Hearsay Accuracy is low to moderate, but not 0 for most Big 6.

• What influences hearsay reputations?
  • Stronger context manipulation?
  • Relationships between the triad members?
  • Goals of triad members?

• We still have a lot left to learn!
Thanks for listening!
